RFP 43 WLAN profile configuration

- 4 Change the desired settings of the WLAN profile. You need at least to define the ESSID setting. The different settings are explained in detail in the sections below.
- 5 Activate the **Profile active** setting, otherwise the WLAN profile is inactive which deactivates the WLAN function for RFPs that are assigned to this WLAN profile.
- 6 Press the **OK** button to apply the settings. If you created a new WLAN profile, you can proceed by assigning the WLAN profile to the desired RFPs (see chapter 7.6.3). If you changed an existing WLAN profile, the settings are applied to the assigned RFPs automatically.

The following description details the different parameters that are available on the **New WLAN profile** page resp. on the **WLAN profile [Number]** page.
